- Sloan is able to pinpoint and articulate the inspiration for this latest collection: " The Reservoir Road in my hometown of Katonah is a beautiful, powerful and creative place. The songs on *Life Grows Back* grew from my time on that dirt road these past two years. I've been walking there since I was a little kid. My Mom used to walk it with me. I feel so much at ease and at peace as I venture onto the riding trail to be by the stream. I am at home there with the trees and the rocks and with the water. In the flow. I have so much history there. It is the place that has taught me about impermanence and how to be comfortable with change. Everything is the same and everything is different."
- Sloan will continue to tour both regionally and nationally in support of the CD.
- Sloan tours as a Trio with Sloan on vocals, Stephen Murphy on guitars and Cadence Carroll on percussion.
- Sloan is the youngest sister to folk-icon Loudon Wainwright and the aunt to the next generation of Wainwright artists, Rufus and Martha.
